

# Care and Transport of Telescope

At check in and check out staff verify Telescope is working and all items are present.

## SAFE Daytime Viewing

Remember:

**NEVER LOOK AT THE SUN**

You will do PERMANENT DAMAGE to your eyes

## Safely Carrying the Telescope

Rest the telescope on your forearm with EZ Finder up. For extra support, hold the base with your other hand.

## Care of the Telescope

- Keep all covers on when not in use.
- Do not touch the glass on the eyepiece or reach into the telescope and touch the lens
- Keep the Eyepiece and Telescope dry
- Always use on a table or stable surface
- Adults should supervise children under 18

## Safe Transport of the Telescope

- Keep all covers on when being transported
- An adult with a Driver's License may safely transport the telescope
- We recommend that only an adult or older teenager carry the telescope

## Safely Transporting the Telescope in a Vehicle

The Telescope must never be transported in a trunk, box or truck bed and must be secured in a seat belt on a seat to prevent significant damage to the Telescope and alignment.

Place in the back seat of the car with a functional seatbelt.

Drape shoulder strap over the Telescope column and the lap bely over the base.
